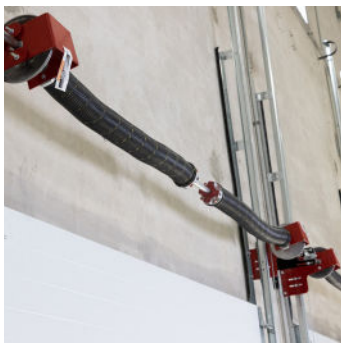
RAYNOR GARAGE DOORS

QUICKDOCK™ SOLUTION

From installation to maintenance and security, Raynor's new patent pending QuickDock door reimagines dock doors with the customer in mind. Raynor has engineered a solution to make the entire process **safer**, **faster** and **easier** while also providing **security** and **reduced air infiltration**. This industry leading design makes QuickDock the new dock door standard.

AVAILABILITY

	QuickDock is an option that can be added to any of the below models.	
Models	S20 S24 S24C	EC200 EC224 TM200
	Width	**Height**
Door Sizes	8'-2" 9'-2"	8' 9' 10'
Colors	White	
Track	2" and 3" options	
Springs	Standard: up to 25,000 cycles Optional: 50,000 cycles	
Quantity	36 door minimum order	
Warranty	10 years (Rust-through & delamination)	
Pairing Options	Operators, Coil Cords, Sensing Devices	



INCREASED SAFETY

A counterbalance assembly mounted 16" above the header, and a one-piece track system anchored at a reduced height, increase safety by eliminating the need to lift the assembly 22 feet in the air.

DECREASED DOWNTIME

The sections, counterbalance assembly and track all come pre-assembled and palletized with QuickDock. This, as well as fewer parts overall, allows for faster and easier installation, maintenance and service, meaning less downtime for the customer.

DECREASED AIR INFILTRATION

A newly designed interior lock secures the door in place while Raynor's innovative windlock cleat keeps the door tight to the jamb for reduced air infiltration.
